

One-to-One Processing

May 2 – May 4, 2008

Led by Devi Tide

One-to-one Processing is an excellent addition to the training for retreat guides, esoteric guides, healers, and therapists. This training develops the capacity to support someone as they shed the inner baggage that keeps them from noticing their true nature and purpose. It provides an inner ease while witnessing the process of awakening and healing in another. We will practice with those techniques that develop a healing glance, thought, words, insight, and healing presence.

Although not limited to Raphaelite Work™ practitioners, this is the next phase in advanced healing work supported by this unique approach to life and health. In the energetic session the RW practitioner works with healing and transformation through touch and presence. In One-to-One Processing (1-1), the use of touch is withdrawn as two people sit across from one another. The practitioner helps the client apply healing presence, and is a support system for processing what emerges. There is no manipulation, no advice, and no interpretation. There is a healing presence to the five bodies (physical, mental, emotional, relational, and spiritual). This approach can be amazingly powerful as a tool to dive deeply into the structures that seem to limit one's experience of natural tone. For RW practitioners this training is another in a series of weekends that is intended to lead to certification in 1-1,

Devi Tide is the Kefayat of the Sufi Healing Order/ North America. She has long experience in the healing arts and as a teacher both of healing and the esoteric sciences. She brings qualities such as wisdom, heart, subtlety, and intelligence to us in her teaching role.
